

Figure 2 depicts a prior art can lid. Specifically, a pull-tab can lid 1 is depicted. With this lid 1, an annular countersink (not labeled) is shown that extends radially outward from a center panel (not labeled). The outer wall 2 of the annular countersink, though, is also the chuckwall; in particular, there is no delineation between the outer wall 2 of the annular countersink and the chuckwall.

The relevance to U.S. Patent Application No. 10/752,928 is that Japanese Patent Application No. 63-125152 details the state of the art of can lid design at the time the U.S. Patent Application No. 10/752,928 was filed.
